- **IT Support:** computer hardware, basic networking, cybersecurity fundamentals, troubleshooting and documentation
- **Programming & Web:** HTML, CSS, JavaScript, Bootstrap, Python, Java
- **Database & Deployment:** SQL, PostgreSQL, Supabase, database design, GitHub Pages
- **Tools:** Git and GitHub, VS Code, AI tools (responsible use)
- **Currently learning:** Windows troubleshooting, IP addressing and DNS, ticketing systems

Projects

AI-Assisted Barangay Service Request System · Web Application

HTML, CSS, JavaScript, Bootstrap, Supabase, PostgreSQL · Live demo · Code

- Built a web system where residents submit and track barangay service requests and staff manage them in one dashboard
- Added resident and admin login, full CRUD, search and filters, and AI-assisted auto-classification of requests
- Secured data with Row Level Security so each user sees only their own requests; deployed on GitHub Pages

Barangay Service Request Analysis · Data Analysis

Google Sheets, Pivot Tables, SQL, PostgreSQL · Code

- Analyzed 217 simulated service requests for top concerns, monthly trends, problem areas, and resolution time
- Identified Garbage / Sanitation as the top concern (29%) and a 44% rise in requests during the rainy season
- Answered the same questions in Google Sheets and SQL and confirmed the results matched

IT Help Desk Knowledge Base · IT Support Specialization

HTML, CSS, JavaScript, Bootstrap · Live demo · Code

- Wrote 8 troubleshooting articles in 7 categories using a standard Problem, Causes, Diagnosis, Solution, and Lesson format
- Built instant keyword search, category filters, and a guide for submitting a proper support ticket
- Deployed a mobile-friendly site on GitHub Pages
